BELT UP AND CLEAN

The Nilfisk UZ 964's ergonomic design and low weight make it so easy to use. No back or shoulder strain whatsoever.

On stairs or cramped and narrow places, wherever pulling a conventional vacuum cleaner is difficult, the UZ 964 solves the problem.

The optional Phase 1 pre-separator is the perfect complement to the dust bag and is ideal for the collection of large debris. It offers increased collection capacity and extra long operating time between bag changes.

For critical cleaning applications, a HEPA filter can be fitted. Other options include a range of nozzles for special cleaning applications, re-usable cloth dust collection bag, telescopic tube and Phase 1 pre-separator.

- Ergonomical, no strain on spine or shoulders
- No machine to pull or push
- 15 m cable gives wide working radius
- Handy storage of accessories on belt
